

Here is how to choose a design company that is just right for you

- 1 Meet the designer who will work on your design, not the 'face' of the company. This will ensure that you will both understand each other;
- 2 Ask to see examples of their previous work;
- 3 Ask for testimonials / references from their previous clients;
- 4 Write a brief. Know exactly what you want to achieve from the design, and...
- 5 Remember, cheap may be cheerful, but it will ultimately cheapen your business. Don't judge a design company by their prices alone. Good design will help you increase your business. You need to invest.
